# GUTTERS AND DOWNSPOUTS

**Pavco Wavin gutters and downspouts** are completely rust-proof and resist exposure to the sun's rays. The interior triangular ridges prevent leaves and dirt from leaves and dirt from adhering to the gutter, preventing clogging. With quick couplings that do not leak, allow for the normal expansion and contraction of each and prevent deformation of the gutter. They are manually tightened and do not require weldings or sealants.

We also have the **Rainmax Downspout** with 4 times more capacity, ideal for all types of building: commercial and industrial.

LEARN MORE! SCAN THIS QR CODE

Lightweight and economical, one section of three-metre downspout weighs 1.89 kilograms.

Non-drip, unique seal design prevents seal design prevents leaks in the system.

Corrosion resistant, they are completely rustproof and resist exposure to the sun's rays.

Quick coupling: joints fit perfectly, no welding or sealants required.

Our products Soldamax and Limpiamax, rebranded to connect Pavco's local experience with Wavin's international solutions.

In addition, the 1/32 gal and 1/64 gal packaging switched from glass to tinfoil, offering you:

Increased hermeticity that delays the evaporation process.

Now with an easy-open lid that is more ergonomic and prevents falsification.

Added resistance, making it stronger to impacts.

With this new packaging we are more eco-friendly as it is recyclable.

The best thing is that this line of products now includes an applicator for greater precision.

Trust quality, don't be fooled by counterfeits.
